

We are **Epiphany RBC**, a **marketing consultancy agency**, inspired by how **people** think and act, **operating globally** with the aim to help **grow businesses**.

And we are **looking for a visual/ui/ux designer!**

Who are we looking for?

We are looking for a visual and interaction designer (32-40 hours per week) who will help us revolutionize market research and turn conventional surveys into true conversations.

You are...

- Someone who likes to take on new challenges
- A problem solver
- Someone who works well independently and is a team player at the same time

The inevitable musts are...

- working experience in web/interaction design
- experience with tools like Sketch, Photoshop and Illustrator
- a portfolio with examples of your visual/ui/ux work

And it would be even better if you...

- studied web design (like Communication & Multimedia Design)
- have experience with prototyping tools like Principle or Framer
- have experience with video/animation tools like After Effects

What will you do?

In the beginning there will be two core job functionalities:

- From preparing assets to designing completely new interactive tools, you will work closely with the rest of the developers and consultants to optimize user experience with a research lens.
- Next to this, we are constantly innovating to:
 - further explore the possibilities of online conversations
 - improve the technical capabilities and scalability of surveys
 - design a strong style guide with great (micro)interactions

What to expect?

- Work with a fun and international team of frontend developers and research consultants.
- The office is located in the city center (Jordaan) of Amsterdam, in a nice 'grachtenpand' at the Prinsengracht.
- You are an important part of the whole, huge opportunity to make a difference.
- Great team spirit (weekly drinks at a local café, boating through the Amsterdam canals, having lunch together and a nice trip every once in a while).

Let's meet!
