

We are **Epiphany RBC**, a **marketing consultancy agency**, inspired by how **people** think and act, **operating globally** with the aim to help **grow businesses**.

And we are looking for a front-end developer!

Who are we looking for?

We are looking for a front-end developer who can help us create online surveys and tools for research projects.

- Mainly front-end (like jQuery, JavaScript, Less, CSS3)
- Back-end is a pre (like PHP, Docker, Ruby on Rails, NodeJS)
- Experience with animations is a pre
- Someone who likes to take on new challenges
- A problem solver

What will you do?

Daily running projects together with the rest of the developers and designers, building online surveys and enhancing conversations. From programming the basics to creating completely new interactive tools. This will be in close collaboration with our consultants, who write the questionnaires and analyze the data.

What to expect?

- Work at the heart on the city Amsterdam, close to central station, in a nice 'grachtenpand' at the Prinsengracht.
- You will be working on projects for big, international clients (like IKEA, Generali and Dorel) that will be seen by thousands of people all around the globe.

- A fun, international team that you will work closely together with.
- The possibility to make a difference, you are an important part of the whole.
- Great team spirit (weekly drinks at a local café, boating through the Amsterdam canals and we get out of the office every once in a while).
- A very nice salary!

Let's meet!
